

DIRECTIONS FOR USE

LIGHT DEPOSITS ON NON-ABSORBENT SURFACES: Dilute 1-part ProJoint Eliminator in 4 parts cold, clean water. Apply with a cloth or sponge. Leave for a maximum of 30 minutes. Extract released residues using a sponge and water.

HEAVY DEPOSITS: Dilute 1-part **PROJOINT ELIMINATOR** in 1 part cold, clean water. Apply liberally, if necessary, agitate with a scrubbing brush or rotary scrubbing machine. Leave to react for 5-10 minutes, keeping surfaces wet with additional **PROJOINT ELIMINATOR** mix. Extract and rinse thoroughly with clean water.

IN EXTREMELY CASES: Pre-wet the affected surface with cold, clean water and apply **PROJOINT ELIMINATOR** undiluted. Agitate with a nylon pad, scrubbing brush or mechanical scrubber. Immediately extract and rinse thoroughly with clean water.

Note, always dilute by adding Eliminator to water, not the other way round. Not recommended to be used on polished surfaces or if under floor heating is in operation.

IMPORTANT: Always test in a hidden area prior to use and only proceed when satisfied with the results. The technical information supplied is based on data obtained by our own research and is considered accurate. However, no liability is accepted for any loss or damage arising directly or indirectly from the use of our products, or from the information given in publications. Prospective users should therefore satisfy themselves by appropriate trials that the product is suitable for the intended use. Do not discharge waste into drains or rivers. Not suitable for use on surfaces that are highly polished, (i.e. polished marble, travertine or limestone). Any contaminated surface should be rinsed off immediately with plenty of clean water. Do not use when under floor heating systems are in operation. Mask and protect any surface not to be cleaned.

WASH HANDS AND EXPOSED SKIN AFTER USE.
